Office: 1.407.680.3914 ~ Cell: 407.683.6816

I am a business professional having dealt with issues and solutions to problems in the areas of business systems processes. With a focus on enterprise-wide business analytics I address the institutional challenges to of business processes across the board. I have been a leader in the organizational challenges and approach solutions that are inclusive and that work across the entire organization.

I provide a complete skill set coupled with a professional business sense that provides me with the ability to understand complex business situations and 'pare' them down to achievable action steps. I have the ability to bounce from technical discussions to business analytical reviews with senior management. My drive, enthusiasm and team work skills allow me to define, develop and implement business process solutions to complex problems.

As an experienced business professional, I have gained valuable skills and knowledge by working in a wide range of industries and applying a varied set of business solutions to complete project tasks and resolve client problems. My employment and consulting history includes such businesses as Health & Lifestyle Counseling, Manufacturing/Distribution, Pharmaceuticals, Oil & Gas, Petrochemical, Telecommunications, Public Accounting, Banking and Finance, Resort and Hotel Management, and Retail Sales and Distribution. Within these organizations, I have performed in positions from clerical to senior management.

During my career, I have enjoyed an in-depth involvement with a varied set of businesses and utilized this to provide productive and cost-effective business solutions. I have worked around the globe reaching from the Prudhoe Bay Alaska to Hong Kong to Europe and Mexico.

I am well versed in financial systems and operations working several years in commercial banking industry and public accounting. I have implemented Enterprise Resource Planning systems for retail, manufacturing/distribution, electronics and pharmaceutical companies. I have also designed and implemented various manufacturing/distribution/financial electronic transaction systems for major manufacturers in the USA, Europe and China.

I have devoted a significant amount of time to research and learning about how Whole Foods and Lifestyle contribute to overall Health & Wellness. The health of a company is reflected in the health of its employees. I understand how lifestyle changes can impact individual and corporate health. This background has provided me with an understanding how to build a health and vital lifestyle environment to support the strenuous work demands of today's executive.

My skills are available on a limited basis under engagement/contract terms only. All engagements are on a time & materials basis, plus expenses. While I will travel anywhere, I would prefer a Central Florida Business opportunity or one that can be done at least 60% remotely.
